

2015

HRIA National
Convention
ADELAIDE
Showground

Australia's only Hire Industry Expo!

OFFICIAL CONVENTION GUIDE

Welcome...

We look forward to welcoming you back to Adelaide for our 2015 Convention with all that this vibrant city has to offer. HIRE 15 – Destination Success aims to provide the innovation, inspiration and

information to help you achieve success. Through displays of the latest equipment and solutions for the hire market, quality speakers and seminar programs plus plenty of opportunity to network with fellow hire industry members, you'll be sure to reach your destination successfully.

The Convention is back in South Australia after a few years on the road, so be sure to make the most of all the region has to offer. Why not take a few days afterwards to explore the city and surrounding area. The beach at Glenelg is a short tram ride from the CBD and has plenty of restaurants showing off the best in local produce. The wine regions of the Barossa, McLaren Vale and Adelaide Hills are all close by and well worth a visit. Kangaroo Island, the York and Eyre Peninsulas are popular coastal destinations, but watch out for sharks! For AFL aficionados the Adelaide Crows take on Port Adelaide at the Oval on Sunday 3 May – something different for your International visitors, guests and families to experience. These are just a few attractions and there's plenty more to choose from: <http://www.southaustralia.com/things-to-do.aspx>

With visitors from the international market attending and leaders in their fields exhibiting their equipment and services, the HRIA Convention is the only place to see the latest in Access Equipment, Generators, Mini Equipment, Tools and Portable Buildings, Event Structures, Flooring, Lighting, Furniture, Rental and GPS Software, Training, Security and Insurance Services and much more all in one place.

Indoor and outdoor exhibitions in one convenient location will showcase the industry's best, providing focused networking opportunities for every visitor. Topping off the event is the Hire Industry Excellence Awards which will bring attention to the outstanding and high achieving members of the industry. All the information to register and book is inside this brochure, so read on and we look forward to seeing you back in Adelaide for another great year of HRIA Convention excellence.

Jeff Bernard
HRIA National President

General Information

HIRE INDUSTRY EXCELLENCE AWARDS

Recognising outstanding achievement and industry excellence, the Hire Industry Excellence Awards pay tribute to the exceptional standards of service and innovation displayed throughout the hire sector. Your MC for the evening will be Barry McLeod.

The Hire Industry Excellence Awards cover seven categories:

- Rental Company of the Year
- Rental Company of the Year - Events
- Supplier of the Year
- Supplier of the Year - Access
- Best New Product
- Best Exhibition Stand - Indoor
- Best Exhibition Stand - Outdoor

Finalists of the Rental Company of the Year and Events Division Finalists receive two complimentary tickets to the Hire Industry Excellence Awards Dinner.

The winner of the Rental Company of the Year will receive two delegate registrations to the following year's Convention 2016 being held on the Gold Coast; two night's accommodation for two (double or twin share); plus return air fares to the Gold Coast (conditions apply).

Winners of the Rental Company of the Year also receive a PR package including company logo on the HRIA website, media promotion and branding in the official industry magazine of the HRIA - Hire and Rental News.

Attendance at the Hire Industry Excellence Awards dinner needs to be booked and purchased separately because it is not included in any of the registration packages. Tickets will not be issued this year and your dinner booking will be confirmed closer to the evening.

KEYNOTE SPEAKERS & SEMINARS

Keynote Speaker Day 1

Dominic Thurbon

Dominic Thurbon is co-founder and Chief Creative Officer at ChangeLabs, designing multi-award winning behaviour change programs that touch over 500,000 people each year. Domonic directs over 50 full-time

researchers and facilitators across three countries. Through partnerships with leading companies such as Apple and IBM, ChangeLabs has created and executed some of the largest change initiatives on earth with visionary brands that drive better business results.

Seminar 1 - Day 1

Effective Safety Equipment Systems – by Caterpillar Safety Systems. Creating a safer hire environment.

Seminar 2 - Day 1

Events Industry Update – by Tom O’Dowd – HRIA Events President – Covering the latest issues and challenges in the events industry.

Keynote Speaker Day 2

Julian Burton

Julian Burton was named the South Australian of the Year 2010 for his work as the founder of the Julian Burton Burns Trust. Julian established the Trust following his long rehabilitation having suffered life threatening third degree burns to his body from the 2002 Bali Bombings terrorist attacks. Today, with Julian’s guidance, passion and vision, the Julian Burton Burns Trust has become Australia’s first national community organisation solely committed to prevention, care and research associated with burn injury.

Seminar 1 - Day 2

HRIA Update – by Oliver Shtein of Bartier Perry; Mason Sier Turnbull’s James Sanders and Brenton Allen; and Arthur J Gallagher. Updates on PPSA, HRNet and Insurance

Seminar 2 - Day 2

EWPA & TSHA Updates – by James Oxenham, Operations Director and Phil Middleton, Training Director. Updates on Secondary Guarding, Inadvertent Movement and Training.

**LED LIGHTING TOWERS WITH
LONGER RUNNING TIME
BETWEEN REFUELLING**

AND ARE PROUDLY

**AUSTRALIAN DESIGNED
AND MANUFACTURED.**

JLG'S NEW AUSTRALIAN DESIGNED AND MANUFACTURED LED LIGHTING TOWERS provide up to 250 hours use between refuelling from their large 288 litre fuel tanks. Their 48V DC 'extra low voltage' systems also eliminate the need for 'Tag and Test' by an electrician. Combine this with easy-to-replace light strips in each individual quick-disconnect light head, an hydraulic articulating telescopic mast that rotates 350° for easy positioning of lights, and a mast elevation up to 8 metres, the future of low-cost-of-ownership lighting looks bright.

Access Sales & Spares

11 Bolitho Street, Sunshine VIC 3020
 Ph: 03 9312 3835
 E: tom@accesssalesandspares.com
 W: www.accesssalesandspares.com

Stand no: 8

With over 30 years of shared knowledge within the elevated work platform industry, Access Sales and Spares has grown into a trusted and well established business. Backed by first class aftermarket service by established sister company Access Worx. We are promoting three products:

- Dingli E TECH S06 E China's Zhejiang Dingli Machinery Co is the leading manufacturer for electric aerial work platforms in China.
- VRS SQUIRREL The industry's new adjustable platform step.
- EZI-LIFT LGA DUCT LIFT SERIES The EZI way to lift what you want when you want!

Access sales and spares have exclusive dealerships in VIC, SA and TAS for DINGLI, VRS & EZI-LIFT.

Action Equipment

2/280 Bradman Street, Acacia Ridge QLD 4110
 Ph: 0431 796 156
 E: sales@actionequipment.com.au
 W: www.actionequipment.com.au

Stand no: 36

Action Equipment is an Australian based private company specialising in New and Used Elevating Work Platform Sales and Refurbishment. We are also the agent for Bravi Work Platforms. As the leading exporter of quality Boom Lifts and Scissor Lifts we carry a wide range of Genie and JLG units and have access to Haulotte, Snorkel and most other brands at short notice. Head office in Brisbane, we have branches in Brisbane, Sydney and Perth and have an extensive dealer network throughout the Asia Pacific region.

Ahern Australia

9 Grex Avenue, Minchinbury NSW 2770
 Ph: 0457 924 111
 E: terry.bronstring@ahernaustalia.com.au
 W: www.snorkellifts.com

Stand no: 42

Ahern Australia is proud to reintroduce the Snorkel TM12 model name at this year's Hire 15, marking the launch of their enhanced version of the popular mast lift: With a 0.5m Roll-out extension deck, New control system for ease of troubleshooting and now common with our slab scissor range, New saloon style door system,

improved solid steel deck surface and at only 830kg, whilst still being outdoor rated for one person, the TM12 is sure to make its mark in the Australian market. Also featuring at this year's show will be a PopUp Push 10. Pop-Up is the world leader in the development of push-around scissor lifts, which provide a safe cost-effective new way to safely work at height indoors. Visit Ahern Australia at stand 42 to meet some of the team, learn about some of the new and improved products being released this year and find out what we can offer you when it comes to Aftermarket Support.

Formit Portable Toilets

1 Co-Wyn Close, Fountaindale NSW 2258
Ph: 02 4336 1000

E: james.robertson@formit.com.au
W: www.formit.com.au

Stand no: 74

Formit Portable Toilets are Australia's largest manufacturer and supplier of top quality portable toilets to the Australian hire industry. All of the plastic Roto moulding and forming of the walls are done right here in Australia at Formit's facility on the Central Coast of NSW. Formit does not buy product designed for other markets - Formit's products are designed and made in Australia for Australian conditions. Also, Formit does not believe in competing with our customers by hiring out toilets or pumping waste - we just sell the best Australian made toilets.

ESCAPE FROM A **CRUSH** HAZARD

Haulotte  Tel: 1300 207 683 www.haulotte.com.au

Generators Australia

PO Box 1659, Canning Vale WA 6970
Ph: 08 6258 4195
E: tim.helfers@aegroup.net.au
W: www.generatorsaustralia.com.au

Stand no: E13

With its new Remote Series Australian owned and operated Generators Australia brings together the global power of Deutz and Kubota engine technology in a robust fully self-contained Australian design.

As the manufacturers and distributors you'll have immediate access to premium quality skid mounted silenced generators with an end capacity ranging from 5kVa to 3000kVa and a hard hitting list of standard features, including IP66 rating; sound, water and dust proofing, and much more.

Fully mine site compliant and meeting Australian standards gen-sets are flexible, easy to set up and use, and available for offshore requirements.

**Genie**

33 Kimberley Street, Darra QLD 4076
Ph: 07 3456 4420
E: catherine.kerton@terex.com
W www.genielift.com.au

Stand no: 46 Outside no: E4

Genie is proud to be the Platinum Sponsor of the HRIA National Convention – HIRE 15 – Destination Success.

Come along and take a ride at our outdoor stand on the amazing Genie SX-180 boom lift, with its astounding 180 ft reach – you'll need a helicopter to go higher!

On display at the indoor stand is the new Genie GS-69 BE scissor lift series. It offers exceptional jobsite versatility. The GS-69 BE is the first rough terrain, high performance electric scissor lifts with an on-board integrated generator to charge the batteries and supply power to the platform and chassis.

The Genie Z-33/18 articulated boom lift will also be part of the indoor display. It is an entirely new compact, lightweight electric Z-boom lift. It weighs 3.6 tonne, with a working height

of 12m and horizontal reach of 5.6m, without compromising the Genie service, reliability and ruggedness. Designed for indoors and outdoors, it can be used on sensitive surfaces if space is restricted.

We will also be displaying the Genie Z-62/40 boom lift, which increases the working height from 20.39m (66ft 4in) to 20.87m (67ft 11in) and has more horizontal outreach than the previous model.

Genie is also displaying its secondary guarding solutions, the Operator Protective Structure (OPS) and the Operator Protective Alarm (OPA). The Genie OPS is an optional device for installation on articulating or telescopic boom lifts and provides secondary protection for operators in the event of contact with an overhead obstacle in certain applications. The advantage of the OPS system is it can be transferred from one platform to another. The OPA system is designed to alert ground personnel when an operator makes contact with the platform control panel. The system interrupts boom movement, sounds an alarm and a light flashes when excessive pressure is applied to the sensing bar. The Genie OPA system can be retrofitted to Genie articulating or telescopic boom lifts post 2002. It is available as an aftermarket option.

HATZ Diesel Australia

7 Hume Road, Smithfield NSW 2164
Ph: 02 8788 7999

RentalSaaS.com is a Queensland based hire/rental software company. RentalSaaS is a complete Rental Management System that integrates directly with your accounting system such as MYOB, Xero and QBO thereby saving your staff significant time and effort that is otherwise spent duplicating the effort. As a cloud based system, RentalSaaS can be accessed from anywhere using a browser. RentalSaaS can be configured for all kinds of rental businesses and has special functionality for Event Management, Repairs & Maintenance and much more.

Royal Wolf

160 Churchill Rd North, Carvan SA 5094
Ph: 08 8262 2422
E: mhartmann@royalwolf.com.au
W: www.royalwolf.com.au

Stand no: E18

Royal Wolf is the industry leader in the hire, sale and modification of new and refurbished shipping containers. Since commencing operations in 1995, Royal Wolf is now recognised as the leading provider of container solutions in Australia and New Zealand. Royal Wolf containers can be specified to meet general purpose, refrigerated or hazardous goods

requirements. In addition to solving storage solutions, shipping containers can be modified by adding doors, internal walls, windows, electricity and water supply, built-in cupboards and floor coverings. This can transform a shipping container into a construction site office, temporary accommodation unit, retail store or a home office. Flexible rental and purchase options and the simplicity with which containers can be modified to meet a range of individual needs, are driving the current demand.

Trilogy Chair

Alloyfold's versatile Trilogy Chair is linkable, stackable, portable and robust. It's suitable for indoor or outdoor use in heavy duty environments and is perfect for hotels, convention centres or for event seating.

The integrated linking system built into the legs is a first and creates seamless looking rows with effortless setup. Removable upholstery options make for easy maintenance. Loved for its modern styling and durable design, this chair offers a range of options including resin seat and back, resin back with padded seat, or padded seat and back. A wide range of colour options and combinations are also available.

Key Features

- Quick and simple linking - no complex brackets or ganging required.
- Creates neat aligned rows.
- Fibreglass reinforced resin is incredibly strong, suitable for outdoor use and heavy duty events.
- Seat and back cushions are slim but comfortable. The back cushion can be easily removed.
- Stacks up to 10 high.

Solar Lighting Tower

Atlas Copco's QLTS 6 Solar Lighting Tower is an example of the company's 'Sustainable Productivity' advantages.

a) Benefits to Rental Companies (vs diesel powered lighting towers):

- Increased Revenue
- Ability to rent to more applications at premium return
 - Can be used in residential areas
 - Overcomes many OH&S challenges
 - Suitable for restricted areas (eg: oil & gas)
 - GPS Tracking - Remote on/off activation,
 - Battery Status reports & location monitoring
- Lower Cost of Ownership
 - Lower Repair & Maintenance costs
 - Less rotating/maintenance parts (ie: no air/oil filters, belts, engine parts, etc.)
 - Virtually no maintenance required
 - No Electrical Test and tag requirements

b) Benefits to End Users (vs diesel powered lighting towers):

- Environmentally friendly
 - Zero emissions (ie: no exhaust gas, CO2)
 - Zero noise (ie: no engine to generate noise)
 - Zero liquid to spill (ie: no oils, fuel, coolants or lubricants to change)
- Very low running costs
 - No fuel required
 - Much less rotating/maintenance parts
 - Virtually no maintenance required
 - No Electrical Test and tag requirements

AUSSIE SCUD AB 30POCKET ROCKET

Aussie Pumps' new 3,000psi engine drive pressure cleaner is designed to set a new standard in cleaning power and value for money. Called the Aussie Scud AB30, the new machine is changing the way hire companies and customers think of portable engine drive pressure cleaners.

Designed for Australian conditions, the machine is a breakthrough in performance and price. "We call it a 'pocket rocket'," Aussie Pumps' Hamish Lorenz said.

"The machine packs more punch yet uses substantially less horsepower than other 3,000psi machines," he said.

The new Scud AB30 is built tough in a compact 'Scud' frame trolley. Using the principle of 'design follows function and emotion' the unit is attractive, robust and designed to be 'bulletproof'.

The heart of the machine is a 'Big Bertie' Bertolini triplex pump developing 3,000psi from a Honda 6½ HP petrol engine and it is backed by Honda's three year engine warranty and Bertolini's three year pump end warranty.

Standard equipment includes 8m of top quality high pressure hose. The hose reel offers 15m of high pressure hose adding convenience, safety and extended life.

EQUIPPED TO DO MORE.

Earth Anchors

Earth Anchors are an 'anchoring system' for 'fixing' structures to the ground. Lightweight and reusable, the Earth Anchor offers heavy-duty load handling with minimum effort. Available from 23cm – 120cm, the Earth Anchor is made from high quality lightweight 356-T6 aluminium.

The hex head design accommodates easy installation with an impact wrench. Baytex's new, further developed PE18-33 Earth Anchor was developed for the 'holding' requirements of tents, marquees and temporary or semi-permanent structures. The flute diameter of the PE18-33 is designed to fit the existing 30mm standard for base-plate staking holes. Benefits over conventional staking methods include:

- Holding Power: Superior holding power to conventional pegs & stakes
- Lightweight: The aluminium advantage: Shipping cost, on-site handling
- Durability: Cast aluminium 356 alloy aircraft-quality, heat treated to T6 specification (NO CORROSION)
- Ease of Use / Reusability: Screw-in, screw-out. No more sledge hammering!
- Increased Productivity: Quicker installation than conventional staking

T: 02 4368 3007

Concrete mixing trailer CMT-100

Cart-Away concrete mixing trailers provide fresh quality concrete in the remotest locations for a fraction of the cost of delivered ready-mix concrete.

- Can be towed behind a 4WD or ute
- Hydraulic rotation and tilt for mixing and dumping
- Mixes concrete while traveling
- Large internal mixing blades for a fast efficient mix
- Simple to use rear control panel
- Trailers can be loaded by our LoadPro belt loading system or via skid steer and FEL loaders
- Capacity = 0.8³
- 11hp Honda motor
- 4 wheel electric brakes with break away brake system
- Vari-height adjustable tongue
- Gearsaver system for easy direction control of rotating drum
- LED lights and tandem 1650kg axles
- Structural RHS steel frame
- Powder coated drum

69 BE Hybrid Scissor Lift

The Genie 69 BE Hybrid Scissor lift can commence work outside using diesel power to recharge the batteries and power hand tools, then move inside in DC electric mode, producing no emissions or engine noise.

The real benefit to operators is they can use one machine externally and internally. No more changing machines when the job moves inside.

The great benefit to hiring companies is the operator hires the machine for a longer duration, meaning greater revenues.

From an operator functionality and productive point of view, the GS-69BE also excels. It offers:

- A selection of 26, 33 and 40ft platform height models
- Lift capacities ranging from 363kg to 680kg
- Tight 2.11m inside turning circle, offering excellent manoeuvrability
- Short wheelbase and good ground clearance, allowing outstanding ability to handle tough terrain
- A 1.52m extension deck, providing greater reach and a larger, more productive work area
- Non-marking rough terrain tyres – meaning it is at home anywhere on site
- The choice of operating in hybrid, or all-electric mode
- On-board power generation in hybrid mode

HA16RTJPRO 16m rough terrain articulated boom

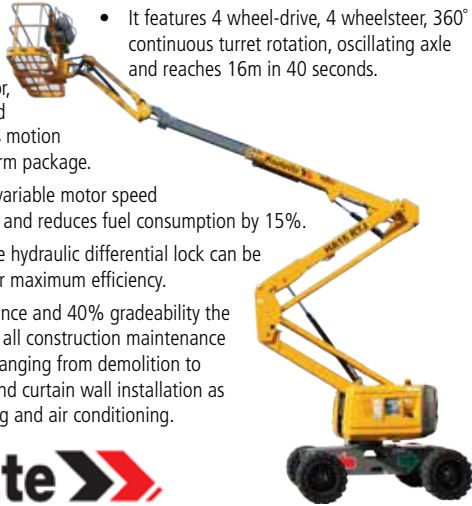

Introducing the new HA16RTJ Pro 16m in just 40 seconds. It is the ultimate combination of engineering expertise and customers' hands-on experience.

Haulotte's new generation 16m rough terrain articulated boom, the HA16 RTJ PRO has been designed in a step-by-step collaboration with customers to ensure it meets industry requirements.

As a result it is robust and durable yet reliable, simple to manoeuvre and easy to maintain. Importantly it is extremely safe.

- It is highlighted by a large basket with swing door entry gate, 6.5kW generator, easy-to-read on board diagnostics as well as motion flashing light and alarm package.
- It features 4 wheel-drive, 4 wheelsteer, 360° continuous turret rotation, oscillating axle and reaches 16m in 40 seconds.
- The Kubota engine's variable motor speed halves the noise level and reduces fuel consumption by 15%.
- For difficult terrain the hydraulic differential lock can be activated manually for maximum efficiency.

With 38cm ground clearance and 40% gradeability the HA16RTJ PRO is ideal for all construction maintenance and building challenges ranging from demolition to steel erection, cladding and curtain wall installation as well as painting, plumbing and air conditioning.

1CXT Backhoe Loader

The all-new 1CXT can run on tracks for reduced ground damage, offers superlative climbing, exceptional pushing power, unparalleled stability and improved soft ground performance.

With the extending digger arm, the 1CXT can dig to depths of 3.08m and reach up to 4m at ground level.

- Superb tractive effort provided by the high-drive tracks, offers great pushing power.
- Stabilisers only required for arduous digging applications, due to the increased stability offered by the tracks.
- Parallel lifts while both raising and lowering as standard.
- With a one-piece bonnet and removable side panels the 1CXT affords quick, easy ground level access to daily checks and routine service items.
- The 1CXT has two work zones. A swivelling seat allows the operator to move between loader and excavator.
- A single side door ensures easy access and has JCB's servo drive controls.
- When excavating, the 1CXT uses classic backhoe, or mini excavator controls. These can be energised when facing rearwards, or at 45 degrees for truck loading.
- The 1CXT's steep-nosed bonnet and front-mounted loader arms provide excellent visibility for safety and confidence.

Executive Silent Pack

Jetwave's Executive Silent Pack high pressure water cleaner is a hot water diesel powered unit, which thrives in frequent usage and duty cycles in any environment without being intrusive or disruptive due to its low noise decibel reading of ≈66dB.

With two models available, the Executive Silent 250 (3600psi / 21lpm) and the Executive Silent 350 (5000psi / 23 l/pm), both run at 1500rpm with a direct soft motor coupling system resulting in less moving parts for better reliability. Features include:

- Quality Interpump pump and Perkins 400 IntelliDrive Nano engine management system, with electronic display and indirect fuel injection technology for lower fuel consumption and vibration reduction
- Environmentally friendly low voltage 12 volt DC vertical diesel fired hot water burner system and emergency stop shut-down
- For any industry where high water pressure cleaning is required with the effectiveness of hot water, but without typical noise disturbance.

Four wheel electric drive hybrid boom

JLG Industries will launch the world's first true four wheel electric drive hybrid boom, the H340AJ at HIRE 15 in Adelaide.

Combining diesel and electric-powered system, the H340AJ provides the power and durability of a diesel-powered machine with the flexibility to work indoors or out. Electric power is stored in eight 12V 100AH AGM batteries, each requiring less recharging time than lead acid batteries. Relies on Tier 4 diesel-powered generator for recharging. Featuring:

- four independent electric brushless AC-drive motors that provide rough terrain performance
- operates in harsh environments, including muddy & rugged terrain
- smooth & quiet variable-speed motors feature proportion-control
- smooth, gradual transition from start to max travel speed (5km/h)
- Direct AC drive reduces hydraulic hoses & fittings & leak potential
- Battery-only operation allows indoor or outdoor use

Power, durability and versatility in a cost effective and environmentally friendly alternative to all-diesel units.

SkyVacuums

Kerrick has launched its SkyVacuums range of gutter vacuums / roof vacuums. Released in November 2014, rave reviews for the SkyVacuum system has led to high demand.

With three products in the range these vacuums provide lightweight, safe and easy access to roofs, gutters, air conditioning vents and more.

The revolutionary new SkyVacuum system allows operators to safely carry out cleaning at extreme heights from the safety of the ground.

Operators simply attach the relevant poles and nozzles to the vacuum hose to get the reach required, meaning there is no longer a need for costly ladders, scaffolding and cherry pickers which pose significant OH&S risks.

The Kerrick SkyVacuum system combines carbon fiber poles with quality Italian designed vacuum cleaners and practical tooling for various cleaning jobs.

The lightweight carbon fiber poles mean operators suffer less fatigue than with traditional fiberglass and stainless steel poles.

Roof cleaners and contract cleaners have been crying out for a safe, practical and lightweight solution to vacuum gutters and roofs for years and **Kerrick finally has the answer.**

100VJR AUS Vertical Platform

The new Manitou product for the award is the 100VJR AUS, for greater performance and productivity.

The 100VJR AUS vertical platform is designed with a vertical telescopic mast, allowing work in restricted areas, as well as a jib to give 3.15m outreach performance.

This great machine has indoor and outdoor rating of 200kg, making it the highest capacity telescopic vertical boom on the Australian market. The previous design gave two person indoor rating and a one person outdoor rating. The new Manitou 100VJR AUS now has two persons indoor and outdoor rating - it is the ONLY vertical boom type mast on the market with this feature.

The drive on the Manitou 100VJR AUS offers smooth movements and efficient battery life through intelligent energy management.

The Australian version of the 100VJR has been modified to comply with the AS1418.10 2011 latest version of the standard.

Other features are simple operator controls with proportional movements, integrated tool box storage area and a simple and reliable load limiting system.

RoboSign

Powerlite's Pike Signals 'RoboSign' is a compact, easy to transport remote controlled STOP/SLOW traffic control system which allows a single operator to control the flow of traffic at both ends of a work area from a safe vantage point.

The remote control eliminates the need for cable links and truly allows the operator to position themselves in the most logical location for that work site.

- The RoboSign is easily collapsed for transportation and storage in the boot of a car.
- The units are battery operated with no need for an external power source allowing the RoboSign to be set up and operating in a matter of minutes.
- The base unit has a continuous operating time of 400 hours when fully charged.
- The remote controlled hand unit's battery pack provides 100 hours of operation between charges or change overs.
- Single operation units are also available for single lane temporary closure, construction/work site or quarry entry/exit etc.

Skyjack SJ6832 RTE

The only machine in its category with four-wheel drive and 45% gradeability as standard, the SJ6832 RTE provides a zero emission scissor lift built with the low running costs and high up time associated with the Skyjack 'simply reliable' AWP design philosophy.

The SJ6832 RTE was built on the same chassis as the existing diesel and dual fuel 68RT units to allow a seamless transition to the RTE. Maintenance costs and time are also reduced due to the elimination of servicing air filters, fuel filters, oil filters, oil changes, belts, coolants, etc.

Skyjack continues to specify class-leading rough terrain performance by making the SJ6832 RTE the first electric scissor lift in its size with 45% gradeability and crossover symmetrical four-wheel drive as standard. Featuring: foam-filled non-marking tyres, near-zero noise levels, zero emissions and the tightest turning radius in its class.

The range-extending genset option adds versatility to the SJ6832 RTE, allowing it to be reliably used at green field sites with no AC power, or when multiple shifts do not allow sufficient downtime to complete a standard charging cycle. The generator can be manually controlled from the platform or set to come on automatically at 50% battery capacity.

CORDLESS CUT-OFF MACHINE

STIHL is proud to introduce the world's first 9" cordless cut-off saw. STIHL has combined its vast experience of cut-off saws with its enduring Lithium-Ion battery technology to power the new TSA 230 cut-off saw.

With no fuel or emissions its battery power makes it suited to use indoors and in enclosed spaces; it is also very quiet-running.

Cutting neatly and swiftly up to 70mm deep, the choice of STIHL abrasive wheels gives the new model the capacity to cut steel and metal pipes, through to concrete, bricks and roof tiles.

For the hire industry it means there is now a product that can be easily hired to a wide range of customers from home owners to professionals to perform a multitude of building, landscaping and DIY tasks.

Features include:

- AP 180 recommended battery
- Spindle lock pin
- Magnesium guard
- Water connection with coupling

Vacuum Tankers

For many years Vacuum Truck Supplies has been building vacuum tankers for the portable toilet service industry. We have a new line of products designed for the hire industry, either to dry hire or use to service your own portable toilet fleet.

Conceived to fill the gap where a hire business doesn't need their own dedicated vacuum truck, but has a large fleet of portable toilets, our EVAC 1600 Portable Vacuum Unit can be carried on your own HD tandem trailer or light truck.

With 1600 litre waste tank and a 650 litre fresh water supply delivered by a 12v pump and 18mm hose, portable toilets can be serviced with one self contained unit.

The EVAC 1600 is skid mounted and designed to fork on and off utes, trailers or light trucks. With full stainless steel construction these units are supplied with hoses ready to go. Self contained, powered by an electric start Honda petrol or Yanmar diesel engine driving a Conde vacuum pump they are reliable and simple to operate.

This new product is available in three sizes, EVAC 800, EVAC 1600 and EVAC3200.

Vermeer S725TX Mini Skid Steer Loader

Vermeer's newest skid steer, the S725TX accommodates a wide range of attachments, has a 340.2kg SAE-rated operating capacity and a 973.0kg tipping capacity, making it very versatile.

A 24.8hp Kubota Tier 4 Final engine features four cylinders producing more torque than models with three-cylinder engines for improved productivity.

Its compact size and track width makes the S725TX ideal when manoeuvring through gates and other tight spaces. The S725TX is available with the standard 9 inch track or the narrower 7 inch track option. Being a tracked machine, the S725TX maintains greater traction and lower ground pressure than that of a wheeled skid steer.

The S725TX was engineered with safety in mind featuring an operator presence system, lift arm cylinder lock and hydraulic parking brake.

The universal attachment plate allows for quick change of attachments. A dual auxiliary circuit option on the auxiliary hydraulic system is available for attachments that require high-flow/low-flow circuits.

The enhanced operator station features a single, pilot-operated joystick for smooth operation. A high-mounted track sprocket design helps keep the drive sprocket out of the dirt to reduce premature wear. The platform also helps keep operators out of the mud and provides optimal viewing of attachments during operation.

AS30 and AS50 Battery-Powered Rammers

Wacker Neuson presents the world's first and only battery-powered electric rammer.

The AS Series battery-powered rammers, available in two sizes (30kg class and 50kg class) use fast-charging lithium iron phosphate batteries, driving a purpose-designed high energy electric motor, to provide emissions-free compaction for all normal rammer applications. They are ideal for work in enclosed or confined spaces where exhaust emissions from conventional rammers pose a health risk.

Wacker Neuson has led the rammer market since it invented the electric rammer in 1932. With the release of the AS Series, the company has maintained its advantage with technological developments, ecological initiatives and occupational health and safety.

Lithium iron phosphate battery technology provides very long deep-cycle battery life, provides reliable performance across a broad temperature range (-10° to 50°C), and a constant power output over almost the entire discharge period. Most importantly, the technology is immune to spontaneous combustion, and will not burn or explode if the battery case is damaged or breached. The AS50 rammer also features uniformly low hand-arm vibration (HAV) around the entire guide handle. It can be comfortably used for extended periods of time.

Are you **missing out** and don't even know it?

The HRIA is working for you!
Are you taking advantage of our services?

The HRIA is working for you and hosts services put in place directly to help members **work smarter and better!** And all the services are **free** - once you're a member!

Services for members include:

- HRNet - Free access to advice and information hotline on **Human Resources** issues
- Red Alert Scheme - advice to members on **stolen or missing equipment**
- DataDot - **Theft prevention** DataDot Reusable Application Kit capable of spraying up to 100 items of plant with ID microdots traceable on a global database
- **PPSA information** and legal advice online: including
 - **Master Agreements,**
 - Updates and FAQs
- National / State representation on key industry issues & **Australian Standards**
- Search engines for **customers**
- **Discounted industry rate** on Westpac eftpos & credit card facilities
- Standard Terms & Conditions of Hire Master Agreement for Plant & Equipment, Vehicles, EWPs and Party & Event
- Industry Code of Conduct
